AERONAUTICAL INFORMATION CIRCULAR

**This Aeronautical Information Circular contains information about
the common transition altitude and transition level within
Minsk FIR.**

Transition altitude and transition level shall be established within Minsk FIR as follows.

Transition altitude shall be 6 000 ft (1 850 m) MSL.

Prior transition level shall be FL 80; for cases when the atmospheric pressure is below 977.2 hPa the transition level shall be FL 90.

Altitudes within Minsk FIR below the transition level shall be determined and maintained by altimeter sub-scale setting to obtain elevation when on the ground (QNH).

The IFR / VFR flights above FL80 shall be performed at levels corresponding to the magnetic tracks, while maintaining the terrain clearance.

ICAO Table of Cruising Levels is applied in Belarus at and above FL80.

When planning flights below the transition level QNH flight altitudes shall be applied.

MAGNETIC TRACK											
From 000 degrees to 179 degrees						From 180 degrees to 359 degrees					
IFR Flights			VFR Flights			IFR Flights			VFR Flights		
FL	Altitude		FL	Altitude		FL	Altitude		FL	Altitude	
	Metres	Feet		Metres	Feet		Metres	Feet		Metres	Feet
						80	2 450	8 000	85	2 600	8 500
